

"3-TANNEN" - DISTILLERY GmbH

PRODUCT PORTFOLIO

For more than 300 years "distilled fruits" are traditionally processed in the "Black Forest" in the South-West of Germany. Only from fresh, fully tree ripened, richly aromatic and especially assorted varieties available only during the summer season the respective fruit mash is carefully prepared. Natural yeast is then slowly fermenting the fruit's own sugar into alcohol simultaneously extracting and preserving this delicate "fruit" flavor. The celebrated **Kirschwasser of Germany** is the classical spirit distilled from the whole fermented fruit of the cherry, and is thus made at "3-Tannen".

Following our principle - as much modern technique as necessary but as much tradition as possible - only small copper vessels instead of large distillation plants are in use to ensure premium quality for all the „3-Tannen“ distillates. It is a must that „3-Tannen“ brandies are distilled at least twice, first by a pot and second by a column rectification step to ensure sensible and optimum preparation of the delicate fruit aroma.

With the exception of a bitters developed nearly 100 years ago by grandfather Alois Herr for his private use, our portfolio consists of fruit distillates only. According to our high quality standards the addition of any kind of sugar or artificial to the fruit mash is strictly prohibited.

"3-Tannen"- FINE FRUIT BRANDIES (EAU-DE-VIE)

Type of Fruit Brandy	Alcoholic strength	Fruit used in manufacture
▪ "3-Tannen"- Kirsch	40 %vol	(Cherry)
